## Common Fund No. 3

### Annual Fact Sheet – 30 June 2016

#### Fund Overview

Common Fund No. 3 [CF-3] provides beneficiaries with the potential to achieve capital growth over the long term. The Fund invests in a portfolio of publicly listed Australian shares, whilst a small percentage of the Fund is also invested in cash.

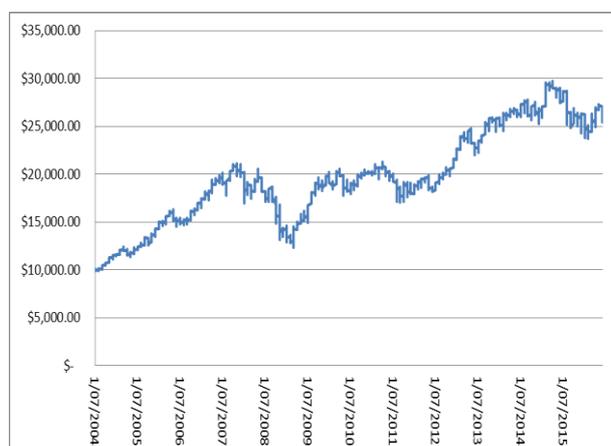

CF-3 operates as a unit trust structure. This means that each beneficiary's investment in CF-3 is represented by the issue of a number of "units" in the Fund, rather than directly owning individual shares. The "unit holding" and the "unit price", which reflects the value of the underlying shares in the portfolio, is used to calculate the value of each beneficiary's investment in CF-3.

Due to the volatile nature of the share market the "unit price" may rise or fall on a daily basis.

#### Investment Approach

CF-3 is actively managed relative to the benchmark but with low portfolio turnover. The Fund primarily invests in large capitalisation shares (commonly referred to as "blue chip" shares) across a range of industry sectors. The Fund will typically hold between 20 and 25 shares.

#### Growth of \$10,000.00 since inception (with distributions reinvested)

## Commentary

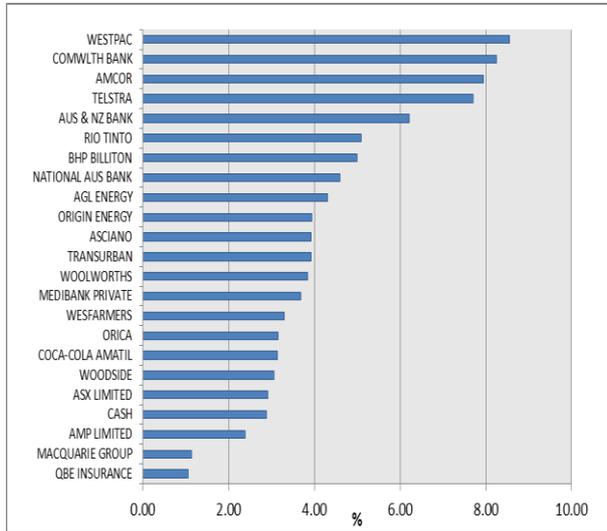

CF-3 invests predominantly in larger ASX listed companies (also known as blue chip shares) and this segment of the market underperformed compared to the broader market and smaller/ midsize companies over the year. More specifically, the key detractors to relative performance over the last 12 months included the Fund's underweight positioning to the Real Estate Investment Trust sector [REITs,] and overweight positions in resource and energy related companies such as Orica Limited [ORI] and Origin Energy [ORG]. Key contributors to relative performance were the Fund's holdings in Transurban Group [TCL], Medibank Private [MPL], and Asciano [AIO].

Whilst the growth return from larger companies has been disappointing they have the capacity to withstand short term periods of volatility and to recover when taking a longer term view. Larger companies continue to payout dividends and their income return remains attractive compared to cash and bonds. Government bond yields hit a record low of under 2.00% during the year, whilst the RBA cut the official cash to 1.75% in May 2016 in an attempt to help stimulate the economy.

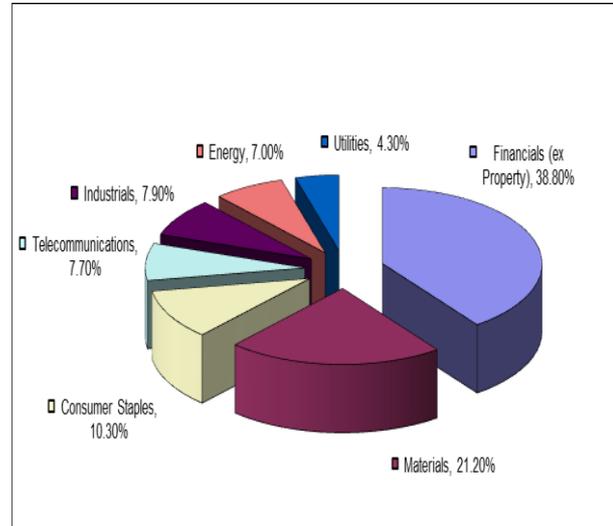

## Holdings

## Sector Exposure (excl. cash)

## Major Transactions

During the first half of the financial year CF-3 participated in a number of capital raisings by taking up its full entitlement to 27,737 new shares issued by Commonwealth Bank of Australia [CBA], 60,921 new shares issued by Westpac [WBC] and 1,296,250 new shares issued by Origin Energy [ORG].

In March 2016, CF-3 sold out of its holding in CYBG Plc [CYB]. CYB is an overseas banking group with operations primarily in the United Kingdom. CYB shares were received as part of the demerger of Clydesdale and Yorkshire Banks from National Australia Bank [NAB].

In the latter part of the year, CF-3 exited its holding in IAG Insurance Group [IAG] and purchased new holdings in QBE Insurance [QBE] and Macquarie Group [MQG].
